

## Detect Multiple Colors

One of the features that makes ez-robot so special is the camera that can detect faces, objects, glyphs, qr codes and multiple colors. For this tutorial, we will use the JD Humanoid. However, this process can easily be applied to any ez-robot configuration.

# Step 1

One of the features that makes ez-robot so special is the camera that can detect faces, objects, glyphs, qr codes and multiple colors. For this tutorial, we will use the JD Humanoid. However, this process can easily be applied to any ez-robot configuration.
